

Blank times table 1 to 20

Fill in each square with its row number times its column number. Start with the rows you know (1, 2, 5, 10, 11), then use them to build the rest: $17 \times 6 = 10 \times 6 + 7 \times 6 = 60 + 42 = 102$.

×	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20

Use the mirror

$9 \times 14 = 14 \times 9$: fill one square and you know its partner across the yellow diagonal (210 different facts).

Build 11–20 from 10

Any row from 11 to 19 is $10 \times$ the number plus a row you already know: $13 \times 7 = 70 + 21 = 91$.
